About this piece

A set of 35 multi-coloured stacking tubular and plywood chairs made by NF Mobilier of France. They stack in sets of six safely. You would expect to find wear to the paint at the knees of metalwork and scuffs and scratches here and there. They have plastic feet so they won't damage any floors. The ply backrests have a pierced oval handle and shaped seats. They are comfortable, very sturdy and a very well-made colourful set of stacking chairs.

Additional Measurements: Seat Height - 46.5cm / 18.31" Inches
