CONDITION	Good

About this piece

Bedside cabinet in **satin birch**, aligned to the *Aesthetic Movement*, **early phase c.1870s–80s** in character. The narrow, vertical format has a framed and panelled door with a **central turned walnut knob**, set within a shallow moulded surround. A simple cornice and a block plinth give architectural footing without excess ornament, consistent with restrained Aesthetic taste for clear geometry and figured timber. The interior includes a shelf for practical bedside storage; the compact footprint suits a tight alcove or chimney-breast recess
