About this piece

An impressive 16 seater Arts and Crafts oak dining table

This originally had two extending leaves which used to slide out from underneath at each end. We could easily have them made again if required, which would make an overall length of **14'** when fully extended. At present, the table measures **11' 6"** length and **4'** wide.

(The table has large decorative brass castors not shown in the images). *Circa 1900.*
