About this piece

C. R. Ashbee

Made by **The Guild of Handicrafts**. An Arts and Crafts copper chalice. The lid features a semi-precious red stone to the wirework handle, rising from a red enamel circular plaque.

The bowl is attached to the stem with sinuous wirework emulating from below the centre of the stem, with leaf decoration at the ends where they join the bowl. The central knob to the stem has copper bead decoration.

The round bulbous base is typical of the work of **C. R. Ashbee**. Originally silver plated.
