### About this piece

Lamb of Manchester, an Aesthetic Movement ebonised and coromandel side cabinet, with a bevelled mirrored and shelved back, a glazed base with a spindle galleried undershelf, stamped to top edge of door. Possibly designed by W. J. Estall. Lambs were one of the very best cabinet makers of the period: A pure Art Furniture company, who's furniture designs were at the forefront in England in the late 1800s.
